ready for chain<sup>®</sup>

# 7 ways to save with readychain®

1

## One PO, One part number, One supplier, One invoice -

With one PO for an igus® readychain®, you can save hundreds of dollars in processing time and money.

2

## Reduction of waste -

With everything precisely built to our customers specifications, there will be no excess material like cable cut-offs that end up in the recycling bin.

3

## Increase throughput -

Assembly time of your machine is decreased meaning you can build more machines in a shorter amount of time and quote faster lead times to your customers.

4

## Decrease storage/inventory costs -

With "just in time", you can save on storage and inventory costs.

5

## Decrease labor costs -

A fully assembled readychain® frees up your team to work on other areas of the assembly process.

6

## Increase floor space -

The areas of your factory floor where you would do cable, hose and E-Chain assembly will be freed up and can be utilized for other processes.

7

## Decrease logistics costs -

With one shipment from one company, you can reduce your shipping and receiving costs dramatically.
